

Department of Chemical & Biomolecular Engineering: Rotation Preference Form

Submission Deadline: [August 29](#)

Rotation Labs

Each graduate student after presentations by the faculty must turn in their preferred list lab rotations. Faculty may also provide documents in a shared Google Drive for students to further investigate research options (this will be provided by Dr. Klauda). The list should be ranked by preference with the first being the top choice. Due to high demand projects, we cannot guarantee your top three choices will be able to be assigned so please list 5 faculty. By October 15th you can request a preferred lab to do your last rotation if this changed from your first selection in August. This change needs to be approved by the faculty of interest. Please email this list to Dr. Klauda (jbklauda@umd.edu) by **5pm on August 29th**.

Ranked Faculty Labs

Please list your preference for faculty labs to do a rotation

Faculty Name

1. _____
2. _____
3. _____
4. _____
5. _____

Student name: _____ Student ID no: _____

Date of submission: _____
